EP KING

Rossi
rossi.com

EP KING is a large planetary gearbox used in heavy-duty industrial applications such as high pressure grinding, cement kilns, and sugar mills. It provides a nominal torque capacity of up to 3,000,000 N m.

EP KING is designed to ensure extreme robustness and outstanding performance even under the harshest working conditions. It is ideal for applications where high strength and reliability are needed.

Features

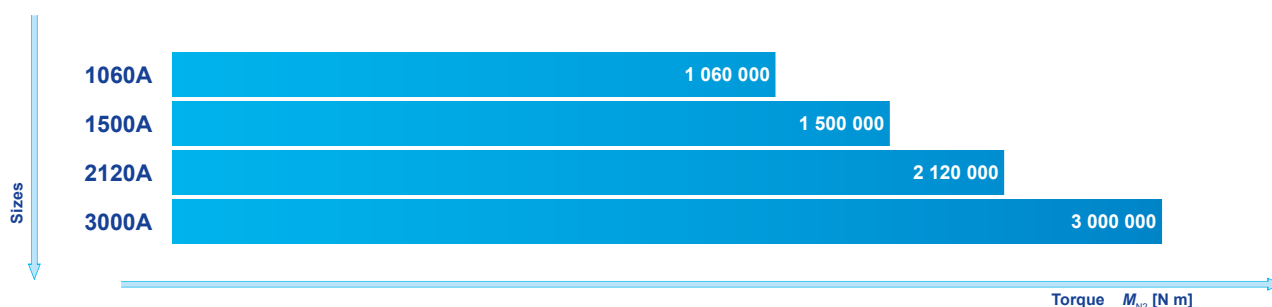

Benefits

Wide range of options and accessories	→ Suitable for the most demanding applications
Compact dimensions and optimized mass	→ For sustainable solutions
Modular system and combined units	→ For cost-effective and high quality solutions
Customization	→ For turn-key tailored made drives

Technical specifications

- 4 sizes (1060A ... 3000A)
- Nominal output torque up to 3 000 000 N m
- Maximum output torque up to 5 400 000 N m
- High performance, easy maintenance
- Fully inline planetary stages or combined with bevel helical gear units (G and H series)
- Innovative solutions responding to real application's needs

EP KING product range

Examples of application

Sugar diffuser

Mining HPGR
