	ENVIRONMENTAL MANAGEMENT SYSTEM: MANUAL	DATE: 11/06/2018
PAGE: 1 / 3	Chapter 05 Annex 3 Environmental Policy	REVISION: N.9

ROSSI S.P.A. - Planetary division was born on 01-10-2010 following merger by incorporation with S.ME.I. S.P.A. (Salentina Meccanica Industriale) company established in 1973 in the industrial area of Lecce.

ROSSI S.P.A. - Planetary Division is now part of the Rossi S.P.A. of Modena, leader in the production of gearboxes and gearmotors. By adopting the Group's strategic development lines, based on the principles of total quality and aimed at respecting and preservation the environment, ROSSI S.P.A. - Planetary division is able to design and produce planetary groups suitable for any type of application, of different sizes and easily combinable with each other, thanks to a modular system developed over the years.

Both production plants of ROSSI S.P.A. - Planetary Division, in the industrial area of Lecce, have implemented a Quality and Environmental Management System in compliance with the UNI EN ISO 9001 and UNI EN ISO 14001 standards

The goal that ROSSI S.P.A. - Planetary Division has always pursued, is to finalize the efforts of staff to a careful management of issues related to Quality and Environment. Making Quality means aiming at differentiating the features of our products through constant research aimed at improving business processes, in particular those relating to the identification of customer needs and expectations of the interested parties involved, the optimization of the production cycle, the improvement of information flow inside and outside the company. Respecting the environment means engaging in a continuous improvement of its environmental performance, always setting new targets for pollution prevention and reduction.

The starting point has been identified in the achievement of the following general goals, which the top management of ROSSI S.P.A. - Planetary Division undertakes to carry out:

- Operate in the reference context identifying and mitigating the risks related to the activity carried out;
- Respect the legal requirements and mandatory requirements by maintaining a constructive relationship with local authorities, competent authorities and control bodies;

	ENVIRONMENTAL MANAGEMENT SYSTEM: MANUAL	DATE: 11/06/2018
PAGE: 2 / 3	Chapter 05 Annex 3 Environmental Policy	REVISION: N.9

- Provide the human and production resources necessary for the implementation of this Policy and the maintenance of the Management System in compliance with the UNI EN ISO 9001: 2015 and UNI EN ISO 14001: 2015 standards;
- Evaluate the environmental aspects of its activities, products and services and adopt management procedures to guarantee the prevention and / or reduction of pollution;
- Clearly identify the needs of the customer to translate them into precise process requirements and commitments;
- Ensure compliance with contractual requirements and offer its customers high quality products with low environmental impact;
- Develop an action to continuously improve processes in order to ensure full customer satisfaction, cost optimization, personnel safety, pollution prevention and environmental protection;
- Promote and implement training programs for personnel at each level and personnel of the companies operating in the sites, in order to optimize the process of human resources growth and for a constant update on environmental, operational and safety issues at work

Within the environmental management ROSSI S.P.A. - Planetary Division has defined the following reference framework of the goals on the basis of which they are reviewed in order to verify the achievement of environmental targets:

- Communicating the principles of environmental sustainability to suppliers, customers and stakeholders that are relevant to the environmental management system;
- Involve stakeholders, promote environmental awareness by involving the largest number of customers and suppliers;
- Improve environmental performance by:
 - Empowerment of personnel on issues of environmental protection;
 - The promotion of the culture of environmental protection through training programs also reserved for the personnel of the companies operating in the sites;

	ENVIRONMENTAL MANAGEMENT SYSTEM: MANUAL	DATE: 11/06/2018
PAGE: 3 / 3	Chapter 05 Annex 3 Environmental Policy	REVISION: N.9

- The choice of ISO 14001 certified suppliers or able to ensure supplies as far as possible conforming to the adopted Environmental Management System;
- The correct and careful management of waste produced in the sites to minimize the risks of environmental impact generated by the temporary storage of the same;
- Monitoring according to the times and methods established by the current legislation on emissions into the atmosphere generated by the work activities of the sites;
- The monitoring according to the times and with the modalities foreseen by the current legislation of the sound emissions generated by the work activities inside and outside of both sites;
- Monitoring according to the times and methods established by the current legislation of the environmental area of the work areas to safeguard the health and safety of its workers.

ROSSI S.P.A. - Planetary Division defines, during the Management Review phase, the specific objectives with the task of monitoring them and periodically reviewing them to evaluate the results achieved and to identify new ones in line with the principle of continuous improvement.

Policy and objectives are communicated to the personnel in order to spread the principles and to guarantee their knowledge and dissemination. The Policy is made available to interested parties by publication on the company website www.rossi.com

Lecce, 11 June 2018

The General Director ROSSI S.p.A.
